EXPERIENCE

Full-Stack Developer Intern — Winsoft Software Consultancy

Sep 2025 – Aug 2026

Kolhapur, Maharashtra

- Built RESTful APIs in ASP.NET Core using Clean Architecture (Controller/Service/Repository layers) with a reusable generic repository pattern to reduce boilerplate across modules.
- Wrote LINQ and raw PostgreSQL queries with pagination and indexed filtering for product, user, and order modules, keeping query performance stable on large datasets.
- Built Angular components, reactive forms, route guards, and HTTP interceptors for token-based authentication; resolved CORS issues and optimized API call chains using RxJS (switchMap, forkJoin).

Freelance Full-Stack Developer — Ritesh Web Solutions (Independent)

2025 – Present

- Built and deployed a responsive Next.js 14/TypeScript business website for client Sah Enterprises, featuring a Resend-powered enquiry system, with automated CI/CD deploys via GitHub Actions to Vercel and Hostinger.
- Audited and improved Lighthouse performance scores and fixed Google Analytics/GTM tracking gaps, improving analytics accuracy for the client.
- Converted the web application into a cross-platform Electron.js desktop app with inventory, invoicing, and customer-record modules, backed by a PostgreSQL/ASP.NET Core API.
- Independently manage SEO, Google Business Profile setup, and marketplace onboarding (Amazon, Flipkart, IndiaMART, GeM) for small business clients.

PROJECTS

Video Portal Studio — Production Management System | ASP.NET Core, Angular, PostgreSQL, JWT, Clean Architecture

- Built a role-based (owner/head/editor/shooter) production management API with JWT authentication, PostgreSQL row-level security, and soft deletes.

LawConnect Portal — Legal Case Tracker | Node.js, Express.js, Socket.io, JWT

- Built real-time case status tracking using Socket.io with role-based authentication and an AI-powered legal news feed via a secured Anthropic API proxy.
